PROFILE SUMMARY

- Data Engineer** with **4 years** of experience as a Software Engineer with expertise in data integration, transformation, and optimization, seeking to build efficient data pipelines and support business intelligence initiatives.
- Accumulated **over 3.9 years of experience in Data Engineering** specializing in data integration, transformation, and optimization within the technology sector. Proven expertise in designing efficient data pipelines that align with business objectives.

EDUCATION DETAILS

 MCA - Prof. Ram Meghe Institute of Technology & Research, Badnera - Amravati with 10.00 CGPA	2020 - 2022
 BSc - Arts, commerce and Science college, Arvi with 68.96 %	2017 – 2020
 HSC - Municipal junior college of science, Arvi with 61.54 %	2017
 SSC - Municipal high school, Arvi with 68.20 %	2015

TECHNICAL SKILLS & TOOLS

- Azure Databricks
- Azure DevOps
- IBM DataStage 11.7 v
- Oracle SQL
- Azure SQL Server
- UNIX Shell Scripting
- Python – Gen AI
- PySpark,
- Git and GitHub
- VS Code
- JIRA /ServiceNow

WORK EXPERIENCES

ATYETI IT Services, Pune - India Data Engineer	May 2025 – Present
--	---------------------------

UBS | Banking Domain

Working for **UBS** as part of the **Credit Suisse to UBS Migration**, focusing on migrating enterprise data pipelines to Azure Cloud.

ROLE & RESPONSIBILITIES

- Created and provisioned Azure resources such as Azure Databricks Workspace, Linux Virtual Machines, and Azure Blob Storage (ADLS Gen2) using Terraform for automated, consistent, and scalable infrastructure deployment
- Implemented **Bronze-Silver-Gold (Medallion) architecture** for scalable, structured data processing.
- Read raw data files from **Azure Data Lake Storage Gen2** using PySpark in Azure Databricks, performed data cleansing, validation, and transformation.
- Developed and managed **ADF pipelines** supporting **Full Load** and **Delta/Incremental Load** ingestion patterns for enterprise data integration
- Used **Azure Key Vault** for storing secrets and enabling secure connections across ADF, Databricks, and on-prem sources.
- Built robust Azure Databricks (PySpark) notebooks to read raw files from ADLS Gen2 and perform cleansing, validation, transformations.
- Performed data cleansing, manipulation, and preprocessing using **Pandas** (merge, groupby, filtering, reshaping, handling missing values)
- Designed reusable **PySpark ETL frameworks** for validation, exception handling, logging, and auditing.

PROJECTS | LeasePlan UK | BFS Domain

LeasePlan UK is a company that offers fleet management services, including leasing, financing, and vehicle sales. It also offers employee car ownership.

ROLE & RESPONSIBILITIES

- Developed and managed **ADF pipelines** supporting **Full Load** and **Delta/Incremental Load** ingestion patterns for enterprise data integration
- Expertise in IBM DataStage 11.7, Oracle SQL/PLSQL, and Unix Shell scripting and python.
- Developed a **DataStage sequence job** based on business requirements for **generating invoices**, ensuring automated, accurate, and efficient invoice processing.
- Migrated legacy **IBM DataStage ETL jobs** to **Azure Data Factory (ADF)** by redesigning end-to-end data pipelines, dataflows, dependencies, and scheduling.
- Worked on **IBM DataStage migration** projects, ensuring smooth transition between versions and environments
- Implemented advanced SQL logic (window functions, subqueries, aggregates).
- Developed and optimized PLSQL triggers, stored procedures, and functions for automation and data integrity.
- Automated ETL job parameters and file handling using Unix shell scripting.
- Worked closely with clients to understand data requirements and deliver ETL solutions.
- Translated business needs into scalable ETL architectures using IBM DataStage and Oracle SQL

BANKING ASSISTANT | Banking Domain

ABC Banking Assistant (ABA): An AI-powered chatbot providing a one-stop solution for banking customers, offering guidance on products and personal account queries. It leverages Gen AI with a RAG approach and a Flash-based frontend.

- Developed an AI-powered banking chatbot using **Python - Gen AI** with **RAG** for customer support and banking queries.
- Designed and implemented **Flask**-based frontend with **HTML, Bootstrap, jQuery**, and **CSS** for an interactive user interface.
- Integrated **Open-AI GPT-3.5-turbo** with Python to provide intelligent responses to customer queries.
- Designed SQL query generation for backend database connectivity to fetch customer-related data.

CERTIFICATIONS

- **DataBricks Certified:** Data Engineer Associate
 - **Oracle Certified:** Oracle Cloud AI Foundation
 - **AWS Certified** Cloud Practitioner
 - **Microsoft Certified:** Data Engineer Associate (DP-203)
 - Azure Database Administrator (DP-300), AZ-900
- **IBM DataStage 11.7**, Power bi, PLSQL, Python(**Udemy**)
 - Google Cloud Fundamental (GCP)
 - The Complete **SQL** Course 2022: From Zero to Expert
 - **Python** for data science.

AWARDS AND RECOGNITIONS

FS Hackathon – Special Recognition Recognized for outstanding performance in Shark Tank Season 4 – FS Hackathon, showcasing innovative solutions in financial services.	2024 December- Chennai Gen AI- Certificate
Rockstar Of The Month Award , Hexaware Technologies Awarded for Timely Delivery Commitment: Received recognition and an award from the customer for consistently meeting delivery deadlines and maintaining project milestones on an ongoing project.	2024 March - Chennai, India Award Certificate
Rank 1 Holder – MCA , (Sant Gadge Baba Amravati University)	2022 Summer Rank 1 Certificate
