

VIVEK KHANKE

Azure Data Engineer

9130367814 | Vivekkhanke123@gmail.com | [LinkedIn - Vivek](#) | [GitHub - Vivek](#) | www.vivekkhanke.in

PROFESSIONAL SUMMARY

Azure Data Engineer with 4.5 years of experience designing, deploying, and optimizing scalable ETL/ELT pipelines and cloud data architectures across the banking and financial services (BFS) domains. Proficient in Python, SQL, Azure Databricks, Azure Data Factory, Medallion Architecture, and legacy ETL migrations. Adept at implementing automated CI/CD workflows with Terraform and GitLab, dimensional data modeling, and developing GenAI solutions.

TECHNICAL SKILLS

Cloud & Data Platforms: ETL, Azure Data Factory, Azure Databricks, Azure SQL, ADLS Gen2, Azure Key Vault, SSMS, ETL IBM DataStage.

Big Data & Processing: ETL/ELT, PySpark, Spark SQL, Apache Spark, Delta Lake.

Languages & Query Languages: Python, Oracle SQL, PLSQL, Java, Unix Shell Script

DevOps & Tools: Azure DevOps, Terraform, GitLab CI/CD, GitHub, JIRA, ServiceNow, VS Code.

Concepts: Data Warehousing, Data Migration, Data Modeling, Data Validation & Reconciliation, Gen-AI

PROFESSIONAL EXPERIENCE

ATYETI - IT Services

May 2025 – Present | Pune, India

Data Engineer - Client: **UBS**

- Migrated enterprise data pipelines from Credit Suisse to Azure Cloud for UBS as part of the Credit Suisse to UBS Migration.
- Provisioned Azure resources including Azure Databricks Workspaces, Linux Virtual Machines, and Azure Data Lake Storage Gen2 (ADLS Gen2) using Terraform, with GitLab CI/CD pipelines for automated and scalable infrastructure deployment.
- Implemented Bronze–Silver–Gold (Medallion) architecture for scalable, structured data processing.
- Developed PySpark-based Azure Databricks notebooks to ingest raw data from ADLS Gen2 and perform data cleansing, validation, transformation, and quality checks.
- Developed and managed ADF pipelines supporting Full Load and Delta/Incremental Load ingestion patterns for enterprise data integration.
- Used Azure Key Vault for storing secrets and enabling secure connections across ADF, Databricks, and on-prem sources.
- Built robust Azure Databricks notebooks to read raw files from ADLS Gen2 and perform cleansing, validation and transformations.
- Conducted root cause analysis of data discrepancies using SQL-based investigation techniques. Performed data analysis using advanced SQL queries to derive business insights.

HEXAWARE Technologies

March 2022 – May 2025 | Chennai, India

Data Engineer - Client: **LeasePlan UK**

- Developed and managed ADF pipelines supporting Full Load and Delta/Incremental Load ingestion patterns for enterprise data integration
- Analyzed large datasets to identify anomalies, and data issues, supporting business decision-making.
- Developed a DataStage sequence job based on business requirements for generating invoices, ensuring automated, accurate, and efficient invoice processing.
- Migrated legacy IBM DataStage ETL jobs to Azure Data Factory (ADF) by redesigning end-to-end data pipelines, dataflows, dependencies, and scheduling.
- Implemented data cleansing, incremental loads, SCD Type 1/2, performance optimization, and production

monitoring across bronze, silver, and gold layers

- Worked with dimensional data models using fact and dimension tables, including Star and Snowflake schemas.
- Developed and optimized PLSQL triggers, stored procedures, and functions for automation and data integrity.
- Implemented data quality checks, reconciliation processes, and monitoring solutions to ensure data accuracy and reliability.
- Worked closely with clients to understand data requirements and deliver ETL solutions.
- Conducted root cause analysis of data discrepancies using SQL-based investigation techniques.

BANKING AI ASSISTANT

Banking Assistant (AI): An AI-powered chatbot providing a one-stop solution for banking customers, offering guidance on products and personal account queries. It leverages Gen AI with a RAG approach and a Flash-based frontend.

- Developed an AI-powered banking chatbot using Python - Gen AI with RAG for customer support and banking queries.
- Designed and implemented Flask-based frontend with HTML, Bootstrap and CSS for an interactive user interface.
- Built an end-to-end GenAI banking solution combining LLM, RAG, Vector Database, Oracle Database, Text-to-SQL, and Flask APIs for intelligent and secure banking assistance.
- Implemented RAG-based document retrieval to provide contextual responses from banking policy and knowledge documents

CERTIFICATIONS

- **Databricks Certified:** Data Engineer Associate
- **Microsoft Certified:** Azure Data Engineer Associate (DP-203)
- **Microsoft Certified:** Fabric Data Engineer Associate (DP-700)
- **AWS Certified:** Cloud Practitioner
- **Microsoft Certified Fundamentals:** AZ-900, DP-900, AI-900
- **Oracle Certified:** Oracle Cloud AI Foundation
- **SohamGlobal Institute:** Python for Data Science

AWARDS & RECOGNITIONS

FS Hackathon – Special Recognition

Recognized for outstanding performance in Shark Tank Season 4 – FS Hackathon, showcasing innovative solutions in financial services.

2024 Dec - Chennai

Gen AI- Certificate

Rockstar Of The Month Award, Hexaware Technologies

Awarded for Timely Delivery Commitment: Received recognition and an award from the customer for consistently meeting delivery deadlines and maintaining project milestones on an ongoing project.

2024 Mar - Chennai

Award Certificate

Rank 1 Holder - MCA,

Graduated with Rank-1 and achieved a **10.00 CGPA** from Sant Gadge Baba Amravati University.

2022 June

Rank 1 Certificate

EDUCATION

Master of Computer Applications (MCA): Prof. Ram Meghe Institute of Technology & Research, Amravati
2020 – 2022 | CGPA: 10.00

Bachelor of Science (B.Sc.): Arts, Commerce and Science College, Arvi
2017 – 2020 | Percentage: 68.96%
